Confirmation of the user contract and important information about your account at mailbox

Hello Shadow Diplomacy,

We are delighted that you have chosen mailbox.

You are currently in the 30-day test phase, during which you can try out all our features at your leisure. Here are a few tips to help you get the most out of your mailbox account.

Restrictions during the test phase

During the 30-day test phase, e-mail delivery is restricted for security reasons. This protects us and our customers from abuse by criminals, fraudsters and spammers. During the test phase, you can send up to 10 e-mails a day to e-mail addresses from "@mailbox.org". We ask for your understanding that unpaid test accounts may not send to external addresses with other providers.

You can find more information about the test phase here: <https://kb.mailbox.org/en/private/account-article/mailbox-org-free-trial-account>

Activation of your account

To fully activate your account, you must select a payment method before the end of the trial period. We offer various payment options and you can make a direct deposit here: Settings (gear wheel) → All settings ... → Payment. You can find more information about our payment methods here: <https://kb.mailbox.org/en/private/payment-article/how-to-pay>

Spam filter settings

At mailbox, e-mails recognized as spam are not normally sorted into a spam folder, but are not accepted in the first place. It is therefore normal for this spam folder to remain empty. If you require specific settings for the spam filter, you can find the following article in our knowledge base: <https://kb.mailbox.org/en/private/e-mail-article/customizing-your-mailbox-org-spam-filter-settings>
